Issue Date:	31/03/17
Version No.	1

MATERIAL SAFETY DATA SHEET <u>ECO-IMPRES-4055</u>

Product Details					
Description:	Styre	ene -Acrylic Emuls	ion		
Product Code/s:	ECC	ECO-IMPRES - 4055 For Indl. (Chem. Ind.) use only			
Recommended Use:	For				
Chemical family:	Poly	mer			
Company Details					
Address: 210/211, Narmada, Laxmi Indl. Premises, Pokhran Rd., Vartak		Telephone	+91 22 25855379		
		Fax:	+ 9122 258	+ 9122 2585 5714	
		E-Mail: sales@anuvichem.com		vichem.com	
-		Website:	www.anuv	ichem.com	
Composition / Information	on Ingree	lients			
Chemical Characterizatio	n	(CAS #	<u>% Range</u>	
Water			2 - 18 - 5	45 - 55	
vv ater					

Ammonium Hydroxide Alcohols - C11 - C15 secondary, Ethoxylated

Hazards not otherwise Classified: According to Regulation 1994 OSHA Hazard Communication Standard; 29 CFR Part 1910.1200

1336 - 21 - 6

68131 - 40 - 8

Emergency Overview:

Use with local exhaust ventilation. Handle in accordance with good industrial hygiene and safety practice. If used as intended, this product is not expected to present a physical or health hazard.

<1% <2%

3. Hazards Identification

Emergency Overview Physical Appearance	Free flowing milky to translucent liquid – Characteristic odour	X
Potential Health Effects		
Eyes	May cause eye burning or irritation on over exposure	
Skin	May cause irritation in the form of redness, burning or dermatitis (last one in severe cases or person being allergic)	Strigtpat
Ingestion	Chemicals present in this mixture may be harmful if swallowed. Also, may affect nervous system and cause abdominal discomfort.	
Inhalation	May cause moderate respiratory irritation, dizziness, fatigue, nausea & headache	

	First Aid Measures					
	-	diately flush eyes with plenty of water for two to three minutes. Remove eye ct lenses (if wearing one) and continue flushing with water for 15 minutes. G cal attention we contaminated clothing and immediately wash affected area with plenty of and water. Seek medical attention where necessary. Wash contaminated ng before use				
	Skin:					
	Ingestion:	clothing before use. Contact local medical practitioner or medical help. Do not induce vomiting unless advised by medical practitioner. If vomiting occurs then keep head lower than hips to help prevent aspiration. Get medical attention immediately.				
	Inhalation:	ve the patient to fresh air (open and airy space), supply oxygen if breathing is alt. Seek medical attention immediately.				
		Remove contaminated clothing and wash the affected body part/s with water				
5.	Flammability & Fir	e Fighting Measures				
	Extinguishing media Hazardous combusti products: Firefighting equipme	 Water spray, Dry Powder and Foam Harmful vapours. Evolution of fumes & fog. Substances / group substances can be released in case of fire. Fire fighters must be equipped with self-contained breathing apparatus and turn-out gear. Contaminated fire extinguishing water must be disposed off in accordance with the official regulations. 				
6.	Accidental Release	(spillage / leakage) Measures				
	General procedure:	 dust / dry sand / universal binder / acid binder or cloth stripes (Chindhi) et Disperse any vapour and flush spill away from the personnel or other 				
		equipment. Contain and recover liquid to the extent possible Collect the liquid in an appropriate container or absorb with an inert material like saw dust / dry sand / universal binder / acid binder or cloth stripes (Chindhi) etc Disperse any vapour and flush spill away from the personnel or other ignitable material. Whatever is collected from the accidental release – trea as prescribed under Disposable Material"				
7.	Handling & Storage	equipment. Contain and recover liquid to the extent possible Collect the liquid in an appropriate container or absorb with an inert material like saw dust / dry sand / universal binder / acid binder or cloth stripes (Chindhi) et Disperse any vapour and flush spill away from the personnel or other ignitable material. Whatever is collected from the accidental release – trea as prescribed under Disposable Material" Do not discharge in to drains, ground water and/or surface water streams.				
7.	-	equipment. Contain and recover liquid to the extent possible Collect the liquid in an appropriate container or absorb with an inert material like saw dust / dry sand / universal binder / acid binder or cloth stripes (Chindhi) etc Disperse any vapour and flush spill away from the personnel or other ignitable material. Whatever is collected from the accidental release – trea as prescribed under Disposable Material" Do not discharge in to drains, ground water and/or surface water streams.				
7.	Handling & Storage General procedure: Precautions against	 equipment. Contain and recover liquid to the extent possible Collect the liquid in an appropriate container or absorb with an inert material like saw dust / dry sand / universal binder / acid binder or cloth stripes (Chindhi) et Disperse any vapour and flush spill away from the personnel or other ignitable material. Whatever is collected from the accidental release – trea as prescribed under Disposable Material" Do not discharge in to drains, ground water and/or surface water streams. 				

Exposure guidelines: OSHA Hazardous Components (29 CIR 1910.1200) – Exposure Limits

ANUVI CHEMICAL LTD. ECO-IMPRES-4055

Personal Protection Equipment:

Eye & face Skin

Respiratory:

Wear safety glasses with side shields or goggles when handling this material Wear impervious gloves and appropriate protective clothing as required to minimize contact with skin A half-face organic vapour respirator maybe worn for protection up to ten or fullface respirator for protection up to fifty times the exposure limit or the maximum use concentration specified by the appropriate regulatory agency or respirator supplier. Whichever is lowest must be followed. For emergencies where the

exposure levels are unknown, use a full-face air respirator.

 46 ± 1

Milky White liquid

9. Physical & Chemical Properties

Physical State % Solid Content Brookfield viscosity cps Spindle 3/RPM 60 at 30°C pН Vapour Density **Boiling Point Freezing Point** Melting Point Solubility in Water Flash Point Flammability Lower explosion limit Upper explosion limit Auto-ignition Density Thermal decomposition VOC or % Volatilities **Evaporation** rate

 400 ± 100 7.5 ± 1 Heavier than air Around 100°C $0^{\circ}C$ Not applicable Yes No flash point (measurement made up to boiling point) Not Flammable 15 % (V) 28 % (V) Due to high water content - product does not ignite 1.04 g/cm^3 Stable up to boiling point < 1 % Not determined

10. Stability & reactivity

No hazards if stored / handled as prescribed Reactivity Oxidizing properties No fire propagation Chemical Stability Product is stable if product is stored and handled as prescribed. Polymerization or Shall not occur, if product is stored as prescribed Hazardous reactions: Conditions to avoid See sec. 7 (Handling & Storage) No such material identified Incompatible material/s hazards Hazardous decomposition No hazards if stored / handled as prescribed products Thermal decomposition Stable up to boiling point

Primary routes of exposure	•
	may include eye or skin contact.
	Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquefied gases.
	Skill contact may be a foute of entry for inqueried gases.
Acute Toxicity:	Assessment of acute toxicity: Virtually nontoxic after a single ingesti
	Oral Type of value: LD50
	Species: rat
	Value: > 5,000 mg/kg
. Ecological Information	
Environmental data	No data available.
. Disposal Considerations	
Product	Material that cannot be transferred to recovery or re-cycle should be
	handled as hazardous waste and the extract disposed off at a Govt.
	Approved waste facility or incinerator (or handed over to waste hand
	authorised contract). Always dispose according to the current regulat or the acts of the country of residence.
	Dispose of in accordance with national, state and local regulations. It
	the waste generator's responsibility to determine if a particular waste
TT 1 1 1'	hazardous under RCRA.
Un-cleaned packing:	Contaminated packing material should be emptied as for as possible a after appropriate cleaning could be re-used or disposed as per the
	regulations.

Information spec com The proo Whe Data		The OSHA Hazard Communication Standard, 29 CFR 1910.1200, Paragraph (g) (4), pecifically permits chemical manufacturers to single MSDS for a category of omplex mixtures, where those " Mixtures " have similar Hazards and contents. Therefore, this MSDS applies to the range of products described in Section 1, or all roducts with the same product name listed in section 1 (unless described otherwise). Where specific data is required for the purposes of regulatory reporting, a Technical Data Sheet shall be provided for the specific product, on request to us manufacturer).					
Disclaimer: Conditi the pro- product for use Approp		mation given herein is offered in good faith as accurate, but without guarantee. litions of issue and stability of the product for particular use and suitability of roduct for specific application/s are beyond our control; all risks of use of this act are therefore assumed by the user. Nothing is intended as a recommendation ses, which infringe valid Patents or extending Licence under valid Patents. opriate warning and safe handling procedures should be provided to all the lers and users of this material.
